

## Trailer types and sizes

# Flatbed trailers

With an open, flat deck and no sides or roof, flatbeds are designed for transporting large, heavy or irregularly shaped cargo that doesn't fit in enclosed trailers. They are versatile, allowing for easy loading and unloading from any angle.

### Details at a glance

**Versatility:** Flatbeds can transport a wide range of cargo that cannot fit in standard trailers.

**Easy loading and unloading:** Without sides or a roof, cargo can be handled from any angle, making the process quicker and more efficient.

**Expanded storage space:**

By accommodating oversized and diverse cargo, flatbeds can reduce the number of trips needed, saving on fuel and labour costs.

**Weight capacity:** : up to 48,000 lbs (21,772 kgs)
